WHY EDUCATION IS IMPORTANT TO ME
By: Joey Hodkiewicz

There are many reasons education is important to me. The most important to me is that education allows me to succeed. My education helps me achieve goals in school and in life. In school, the goals I have are learning and getting good grades. In life, I have many different goals and my education has helped me reach those goals. Things like building my fort, playing sports, helping with chores around the home. All these things are done easier by me because of the things I have learned during school.

Education is the foundation for everything in life. Education gives us knowledge for our schooling years which helps us earn the right to go to a good college. A good education is important for your future, because the more you put into it, the more you will get out of it.

Most of all, I think education should be treasured. Education is a privilege. Some schools in the world aren’t lucky enough to have good learning programs, and some places don’t even have schools. So, I am very happy to be in a good school that helps me get a good education. After all, education gave me the knowledge to be able to write this essay.

So, some people may not cherish an education as much as I do, but someday I hope they do because a good education is very important in life.
