WHY EDUCATION IS IMPORTANT TO ME

When most people think of education, they think of getting into a great college, which is awesome, but I believe there are other ways a good education will help me. Education is important because without one, or with a bad one, you feel disconnected from the world, and you can’t really live a successful life. With a decent education I can change the world, or at least make a major difference. I am not entirely sure how I can make a difference, but I know a good education will help.

I think a good education is imperative because it will influence my life in the future. It will help me get a well paying job, or open up a dance school, which is something I am passionate about. In a business, you are usually dealing with bills, tuition, and purchases, so a great deal of math is involved as well as organization and people skills. A great education will also help me get into a music college, so I can pursue my dream of being a singer, or at least get into a college I am satisfied with. Theses are some plans I have for the future, and a decent education is key to make these plans a reality.

I also think an excellent education is crucial because it will affect my family in one way or another. It will benefit the family I have now, and the family I will have in the future. I hope to support my future family financially, with the great job education will help me get, and by being a role model and educator to the children I will raise. I want to be able to answer questions my children will have, to give them knowledge and a decent education for their futures too. An education would also impact the family I have now because a nice education would give me a chance to go out into the world, get a job, and somewhere to live. Without a job I would not have the money to provide for myself, or get a home, and that would be an inconvenience to my family now. As you can see, the education I get or do not get will affect my family, and family is very important to me.

In conclusion, I believe education is essential in every area of my life. I’m not sure many people realize it, but education is an extremely critical part of life. By having a decent education, my life can enhance the lives of others. A man named Nelson Mandela once said, “Education is the most powerful weapon we can use to change the world.” And I want to change the world. To me, a good education equals a greater life.
